

The information in this document is of a general nature and is not specific to particular plant varieties, climates or situations. It is intended to be used as a guide for beginner gardeners only. It is suitable as a guide in Australian conditions only. The Australian environment is very varied, where possible gardeners should seek local advice. Every attempt has been made to make this guide as accurate as possible, however its accuracy cannot be guaranteed and errors may remain.

Knowing your climate zone will help you decide the best time to sow the vegetables, herbs and flowers you want to grow, and which varieties should perform well in your garden. Growing plants that are suited to your climate zone will usually give you the best results in your garden.

How to Use Climate Zones

First, find your climate zone using the map or descriptions below. Next, refer to the sowing charts on the following pages, which provides approximate sowing times for our most popular seeds for each climate zone.

While knowing your climate zone is helpful when planning your garden, there are many other factors that may affect how your plants grow, including unseasonal weather conditions, the specific microclimate of your garden and how you care for your plants. You know your garden better than us, so if a different climate zone seems to 'fit' your garden better, go ahead and use it as a guide.

Our climate zones cover huge areas of Australia, so we recommend gardeners also consider their local conditions when planning what and when to plant. For example, gardeners in alpine areas have shorter growing seasons than gardeners in cool coastal areas, even though both alpine and coastal areas are included in our 'Cool Temperate' climate zone. We recommend gardeners in cool regions look at the 'days to maturity' information provided for each variety and choose those that will mature in a short (6-12 week) growing season.

Tropical

- Includes: Darwin, Cairns, Townsville, Exmouth
- High humidity summers with most rainfall in summer and dry, warm winters. Includes northern Australia from Exmouth (WA) across to south of Townsville (Qld).

Arid

- Includes: Alice Springs, Mildura, Albury-Wodonga, Shepparton, Wagga Wagga, Dubbo
- Hot dry summers, winters can be warm or cool depending on the region. Includes a large area of central Australia from the WA coast to Charleville (Qld), Tamworth (NSW) and Albury-Wodonga (NSW/Vic).

Subtropical

- Includes: Brisbane, Bundaberg, Coffs Harbour, Gold Coast, Hervey Bay, Mackay, Rockhampton, Sunshine Coast
- Warm humid summers with high summer rainfall and mild winters. Includes coastal Queensland and northern NSW from north of Mackay to just south of Coffs Harbour.

Warm Temperate

- Includes: Sydney, Perth, Adelaide, Newcastle, Toowoomba, Central Coast NSW, Wollongong, Bunbury
- Moderate humidity and reliable rainfall, with four distinct seasons. Includes coastal areas from north of Port Macquarie to south of Wollongong in NSW, coastal SA and the southeastern coast of WA.

Cool Temperate

- Includes: Melbourne, Canberra, Hobart, Launceston, Ballarat, Bendigo, Geelong, Mt Gambier
- Low humidity with most rainfall in winter; hot dry summers and cold winters. Some regions will experience frosts and snow. Includes coastal areas of south-eastern Australia and alpine areas of Victoria, NSW and Tasmania.

The Seed Collection is an Australian business dedicated to providing Australian gardeners with access to quality seeds at a fair price. Herb, vegetable and flower seeds. nonhybrid, nonAll varieties are GMO and have had no chemical treatments.
